Giovanni Sorrentino

JR FULL-Stack web Developer

While I was in school, I got introduced to the programming of CNC machines. After several years of practice in the field, I realized that I really enjoyed the programming itself. To improve myself, I wanted to use more innovative and versatile tools. Therefore I started a six-month course at the Boolean institute. Here I was able to accomplish my aspirations and improve and broaden my programming skills.

Experience

24/01/2024 - 17/07/2024

BOOLEAN

(Training for) Jr Full-Stack Web Developer

- I created a Portfolio application in which I included all my projects. The storage was managed by **GitHub** on the backend. Visitors were able to view the finished work from my training with Boolean.
- Further, I created an app similar to Airbnb with a team, Using **PHP**, **MySQL** and **Laravel**. It allowed registered users to add apartments. For the frontend, **Vue.js** and **JavaScript** was used. Unregistered users were able to view the apartments and contact the owners for information.

11/01/2021 - 15/12/2023

P.M.P s.r.l

Operator and Programmer

- CNC machine programmer and personal work organization
- Direct Communication with Department Managers
- Time Management and making sure to meet the deadlines
